

Cell Lines Cultured in Bio-Blocks

This list consists of known cell lines grown in the Bio-Blocks. We have customers in the CDMO, CRO, Biotech, Government, Academic, and Pharma markets that do not share this information with us.

1. Human Wharton's Jelly Cells (Primary MSCs)
2. Human Bone Marrow Derived Stem Cells (Primary MSCs)
3. Human Adipose Derived Stem Cells (Primary MSCs)
4. Human Skin Derived Induced Pluripotent Stem Cells
5. HepG2 Cells (Liver Carcinoma Cells)
6. Human Adult Dermal Fibroblasts (Primary Cells)
7. Human Neonatal Dermal Fibroblasts (Primary Cells)
8. Human Adult Keratinocytes (Primary Cells)
9. Human Induced Pluripotent Stem Cells (hiPSCs)
10. Mouse Dorsal Root Ganglia (Primary Neural Cells)
11. Porcine Chondrocytes
12. Porcine Osteocytes
13. UB-OC2 Cells (Immortalized Mouse Cochlear Epithelium)
14. Equine Muscle Derived Stem Cells (Primary MSCs)
15. Human Myoblasts (Immortalized Muscle Cell)
16. Bovine Myoblasts (Primary Cell Line)
17. Plants
 - a. Rosemary
 - b. Tobacco
 - c. Tomato
